

Break Glass Key Holder

This 'Break glass' key holder is for key storage for emergency use. The highly visible holder is available with either a plain window or a window with printed instructions. A secure 'snap-fit' design makes placement of the key easy, and the plastic window breaks safely when it needs to be accessed. A hammer with chain, that can be attached to the holder is also available.

- › Unique snap-fit design.
- › Made from durable ABS plastic and crystal styrene window for safety.
- › We recommend the use of a hammer when breaking window.

› JBG1 : Break Glass Key Holder with Plain Window

› JBG2 : Break Glass Key Holder with Printed Window

› HAM1 : Hammer and Chain

Panic Bolt

Manufactured from cast aluminium, Redlam panic bolts are the economical solution to the problem of providing reliable security for internal emergency exits. Breaking the ceramic tube results in the bolt sliding back automatically and unlocking the door. The Mk1 Redlam panic bolt is designed for single emergency exit doors.

- › Economical solution for internal emergency exits.
- › Provides reliable security.
- › Manufactured from cast aluminium.
- › Simple to operate.
- › Safe for use in any work place.
- › Replacement tubes available.
